FEATURES

RS-FLEX RAPID-DRY • SUPER-STRETCH

RS RS FLEX

Our latest evolution in neoprene!
150% textured stretch neoprene, 20% lighter 30% less water absorption than X-Flex.

GLIDE SKIN FLEXIBLE RUBBERISED COATING

GLIDE GLIDESKIN

Allows you to slip in and out of your suit with ease and comfort.
The flexible rubberised coating means you won't get painful rubbing around your neck or wrists allowing you to kayak all day without irritation.

TITANIUM NEOPRENE

TITANIUM

Used in the main body panels of most of our suits. T2 neoprene acts in a similar way to a survival blanket, and reflects body heat back to the body.

LIGHTWEIGHT THERMAL INSULATION THERMOSPAN WICKS MOISTURE & LOCKS IN WARMTH

THERMOSPAN

Engineered by our scientists so that your core body temperature locks in the heat. By wicking away your body moisture the lightweight thermal insulation traps warm air all around you, keeping your core body warm helping blood to pump around your body creating your own central heating system.

YKK AQUA SEAL

This amazing AQUASEAL® zipper from YKK is perfect for active marine sportswear. Smoother and more flexible, it offers optimum protection with a film-coated tape and an innovative zipper element mechanism. Keep the water out with YKK!

TIZIP

The TIZIP Master Seal 10 is made from high-strength fabric coated with thermoplastic polyurethane. The extra strong plastic teeth are fixed on the top and bottom of the zipper tape. The zipper's coupling elements keep the sealing edges tightly sealed together when the zipper is closed. The zipper tape can be both welded and glued. The TIZIP Master Seal 10 slider is made from a metal compound which is non-skin-irritating and salt water resistant. The slider movement is contact free and does not wear on the zipper tape or the sealing edge.

TIZIP ZIP DISK

New to Gul the TIZIP Master Seal 10 Zip Disc open ended zip mechanism allows the garment to fully separate. T2.865 is made from high-strength fabric coated with thermoplastic polyurethane. The extra strong plastic teeth are fixed on the top and bottom of the zipper tape. The zipper's coupling elements keep the sealing edges tightly sealed together when the zipper is closed. The zipper tape can be both welded and glued. The TIZIP Master Seal 10 slider is made from a metal compound which is non-skin-irritating and salt water resistant. The slider movement is contact free and does not wear on the zipper tape or the sealing edge.

HYDROSHIELD UV 50+ waterproof & windproof

HYDROSHIELD

The ultimate 3-layer base layer defence system, giving you total comfort and protection even in the most extreme conditions. The water repellent 4-way stretch shell is combined with element protection core membrane. The core membrane creates the ultimate thermal and moisture regulating system that allows the fabric to breathe, but prevents water/wind penetration however tough the environment. The inner face fabric helps wick moisture away from the skin as well as keeping you well protected from sun with 50+ UPF sun protection.

FABRIC FEATURES

For everyday to difficult conditions GCX2 fabric will keep you warm, dry and comfortable. Gaining the most from your watersports experience, allowing you to perform at your best for longer.

WATERPROOF : 5,000 mm
BREATHABILITY: 5,000 gr/m²/24h

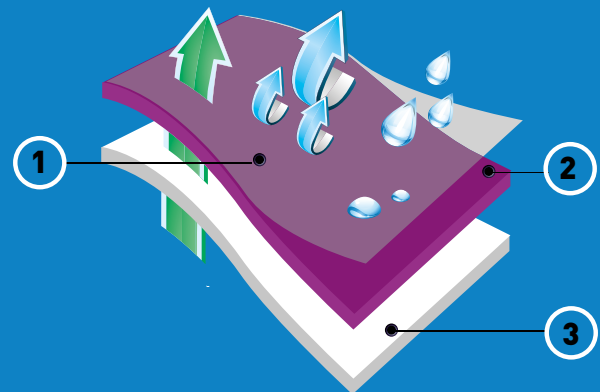

**WATERPROOF /
WINDPROOF / BREATHABLE**

For wet, cold and windy conditions, GCX2.5 EVO mechanical stretch fabric will keep you warm, dry and safe. Gaining the optimum experience, allowing you to achieve personal goals.

WATERPROOF: 10,000 mm
BREATHABILITY: 5,000 gr/m²/24h

**WATERPROOF /
WINDPROOF / BREATHABLE**

1.DWR:

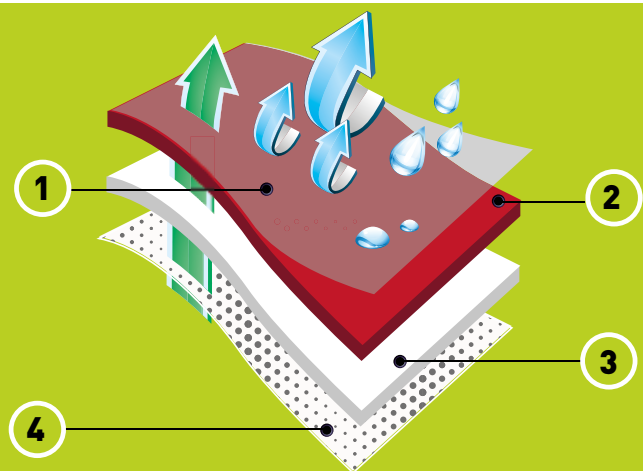

Durable Water Repellent prevents water absorption maintaining breathability.

2.NYLON RIPSTOP:

Woven face fabric. Selected for softness and durability.

3.HYDROPHOBIC MICROPOROUS COATING:

Waterproof breathable barrier applied to face of fabric allowing moisture vapour to evaporate.

1.DWR:

Durable Water Repellent prevents water absorption maintaining breath-ability.

2. EVO NYLON:

2/2 mechanical stretch woven face fabric. Selected for flexibility and durability.

3.HYDROPHOBIC MICROPOROUS COATING:

Waterproof breathable barrier applied to face of fabric allowing moisture vapour to evaporate.

4. D-MATRIX:

Distinctive raised print applied to hydrophobic coating to decrease surface wear and increase moisture wicking.

For extreme wet, cold and windy conditions, GCX3 fabric will keep you warm, dry and safe. Gaining the optimum experience, allowing you to achieve personal goals, because the challenge never ends.

WATERPROOF: 20,000 mm
BREATHABILITY: 10,000 gr/m²/24h

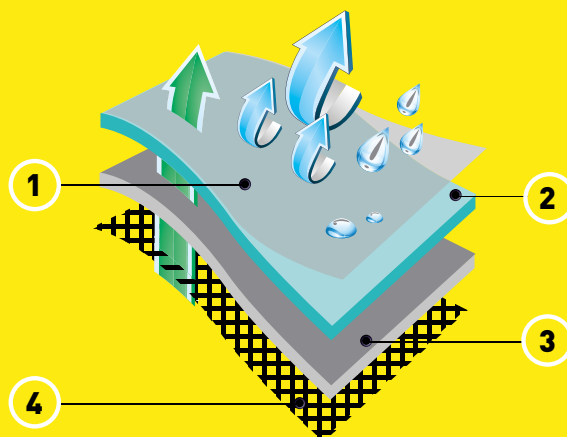

**WATERPROOF /
WINDPROOF / BREATHABLE**

For extreme wet, cold and windy conditions, GCX4 EVO mechanical stretch fabric will keep you warm, dry and safe. Gaining the optimum experience, allowing you to achieve personal goals, because the challenge never ends.

WATERPROOF: 20,000 mm
BREATHABILITY: 10,000 gr/m²/24h

**WATERPROOF /
WINDPROOF / BREATHABLE**

1.DWR:

Durable Water Repellent prevents water absorption maintaining breathability.

2.NYLON:

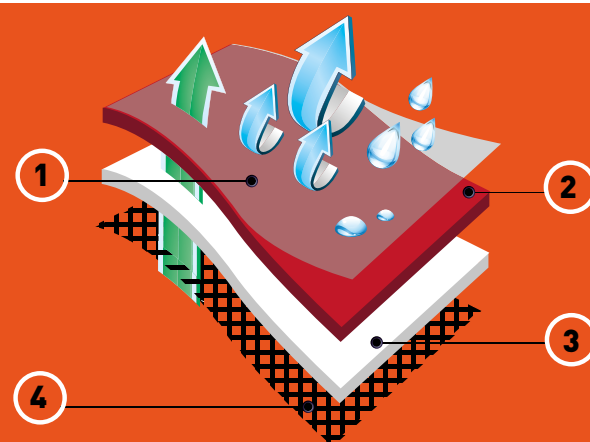

Woven face fabric. Selected for flexibility and durability.

3.HYDROPHOBIC MICROPOROUS MEMBRANE:

Waterproof breathable barrier applied to back of face fabric allowing moisture vapour to evaporate.

4.TRICOT:

This nylon mesh inner layer disperses moisture vapour to the hydrophilic coating. Providing a soft layer between your skin and the garment.

1.DWR:

Durable Water Repellent prevents water absorption maintaining breathability. 2.EVO

2.EVO NYLON:

2/2 mechanical stretch woven face fabric. Selected for flexibility and durability.

3.HYDROPHOBIC MICROPOROUS COATING:

Waterproof breathable barrier applied to face of fabric allowing moisture vapour to evaporate.

4.TRICOT:

This nylon mesh inner layer disperses moisture vapour to the hydrophilic coating. Providing a soft layer between your skin and the garment.

PRODUCT CARE

With the correct care you will gain the maximum life from the product. Always rinse any salt water from products after use in clean water using a mild detergent if necessary. Please pay particular attention to remove any sand or foreign matter from the zips. Don't use any solvents or other chemicals to remove stain or marks from your garment as this can cause damage.

Do not leave to dry in direct sunlight. You will find a care label and washing instructions on the inside of all our garments, please follow these to ensure your garment maintains a long lifespan.

LATEX SEALS CARE

- Before use of the garment remove all sharp objects such as jewellery, rings and watches.
 - Open the neck seal with both hands whilst donning.
 - Neck seals can be trimmed to size with scissors.
 - Exposure to sunlight, cosmetics and sunscreen and sometimes-natural oils in the skin can result in failure.

A black and white photograph of a person wearing a wetsuit, holding a surfboard. The person's hands are visible, gripping the board. The wetsuit has a dark belt with buckles. The surfboard has a white and black patterned fin box. A solid blue vertical bar is on the right side of the image. A bright yellow diagonal line runs from the bottom left towards the top right, crossing the blue bar and the text. The word "spraydecks" is written in white, lowercase, sans-serif font, oriented vertically and centered within the blue bar.
